to create it - Abraham Lincoln

PYLAMP

A UNIT OF CSE

A platform to upskill your knowledge.

The **Club PyLamp** was developed to sow the seeds of coding, problem-solving, and domain knowledge among students. Mentoring sessions are conducted twice a week to build a consistent learning environment for students to help them master their coding skills. We conduct domain awareness programs to expose students to various fields of the industry. Personalized events are conducted regularly to check the understanding of students to organize future sessions accordingly.

We aim at making students confident in their programming skills and get a clear vision to attain career growth.
